

Icologiq Elements Mobile

Register and consult,
anywhere and always

Do you want to be able to register inspection results or safety notifications at any given moment? Are your employees frequently on the road and is it important for them to insert or consult information from their given location, simply by using their mobile or tablet? Icologiq Elements Mobile enables you to add any type of QHSE notification, anywhere in the world, to Icologiq Elements.

Employees can insert information, even when they do not have reception. This information will be added to the platform as soon as connection is established. Business-critical information is quickly sent and safely stored in the QHSE-process concerned due to a safe connection. Employees have direct access to entered information, and workflows concerning this module guide the follow up process.

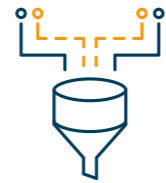

Capture incidents on the spot. Even when there is little or no reception

Immediately initiate the follow up process. Employees no longer depend on their work location

Safe and secure information transfer. Encrypted messages to send sensitive information

Single uniform method to insert information. In accordance with the platform method

How does it work within my organisation?

Access and register information at all times and in all places using a mobile or tablet. This is how your employees are able to register and consult the Icologiq Elements platform. When a registration comes in, next steps will be determined using previously defined workflow within the Icologiq Elements platform. Users receive task reminders based on the roles and rights system.

We work with you to connect Icologiq Elements Mobile to your platform by configuring the interaction. As a result, processing time decreases and copying information is no long necessary.

Functionalities

- **SHE Management**
Register incidents and/or unsafe situations on the spot. Immediately record information and footage using mobile or tablet.
- **Complaints Management**
Register and document client complaints when on the road or on location.
- **Document Management**
Track down and consult documents to support work on location.
- **Continual Improvement**
Submit innovation proposals using a mobile or tablet the moment ideas come up.

Quick and safe information transfer due to an excellent connection between platform and devices

Workflow support available on mobile and tablet

No information loss due to immediate registration

Add files and pictures, making settlements easier

Scalable, multilingual templates which can be used worldwide

They are happy with Icologiq Elements Mobile:

Wondering how Icologiq Elements can work for your organisation?

Wij denken graag met u mee! Neem contact op met onze adviseurs voor meer informatie.

Peter Deen
IT Manager MediccSports

“Thanks to the simplicity of Icologiq Elements Mobile, ideas are never lost. Wherever our users are, every idea is quickly registered as input for our innovation process.”

Modular

Icologiq Elements is a modular system which can be easily set up and extended with multiple modules. Start improvement actions in Continuous Improvement based on preventive actions or change documents in Document Management if that is part of the improvement.

Professional Support

During both the implementation and the period thereafter.

Global deployment options

The modules can be deployed easily at other locations (globally).

Immediate result

Modules can be implemented easily and are ready to use.
