

# Icologiq Elements Suite

## The benefits of a single central QHSE | GRC platform

Are you looking for a safety or quality system and would you like to digitalise improvement processes? Do you want to bring out the best in people and teams, and enable them to focus on core tasks? From a centralised point in the organisation, Icologiq elements allows you to facilitate process innovation practices.

We help you digitalise processes that aim to transform fragmented local solutions and spreadsheets into trustworthy and transparent enterprise solutions. The Icologiq Elements suite tackles challenges related to quality, health, safety, and environment within your organisation and operational management.

Within the Icologiq Elements platform, we offer the following modules:

**Document Management**  
One single central place for business critical documents.

**Complaints Management**  
Innovate the process of handling complaints to improve customer experience and learning impact.

**SHE Management**  
This module enables you to systematically capture and handle incidents, accidents and opportunities for improvements

**Audit Management**  
All aspects related to effective audits, from planning to settlement, come together in this module.

**Compliance Management**  
Obligations of each business unit or location are registered and secured in this module.

**Continual Improvement**  
This module manages improvement projects from a central point and secures the quality of innovation by tracking its progress.

**Management of Change**  
This process supports the structured implementation of making changes, offering insight into changes made, and its history, at any given point in time.

**Risk Management**  
This is the connecting piece of the puzzle for all disciplines within the organisation when it comes to identifying, monitoring and reducing risk.

**Training & Competence Management**  
Certification is essential for a safe work environment and permanent compliance.

Besides the 9 modules that enable the digitalisation of your processes, Icologiq Elements also offers the following services. These can be deployed as soon as one or more modules are used:

**Icologiq Elements Analytics**  
Control and analyse data of all processes by means of clear and comprehensible dashboards.

**Icologiq Elements as a Service**  
This service guarantees the maintenance on the Icologiq Elements platform, as well as the underlying hardware and server structure.

**Icologiq Elements Mobile**  
Record and consult information on your mobile or tablet anywhere and at any time in the Icologiq Elements platform.

# How does it work within my organisation?

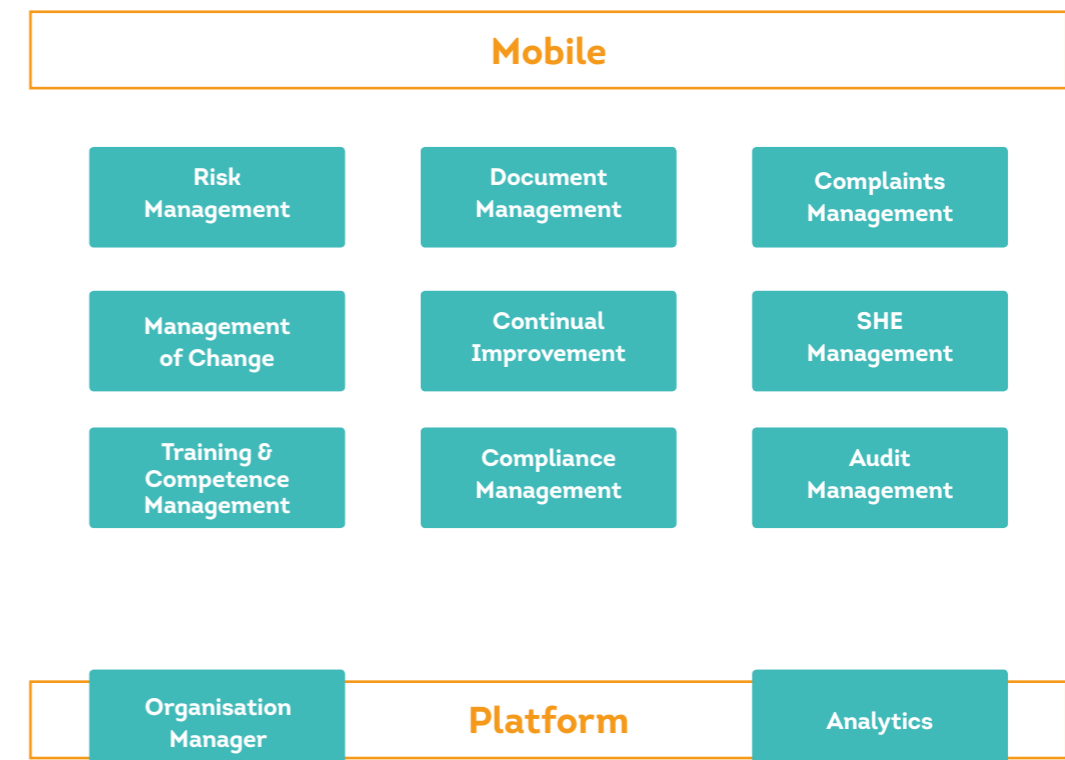

**Icologiq Elements offers you 9 standard modules to choose from, allowing you to mix and match your QHSE | GRC-management system to meet the needs of your organisation. For instance, for systematic risk prevention and reduction, the combination of the modules Risk Management, Document Management, and Continual Improvement might be the right fit for you. Step by step, everything related to quality and compliance will be placed into Icologiq Elements. Does your organisation have other needs which need digital support? There are numerous combinations possible with our modules to support the needs of your organisation.**

Icologiq Elements supports processes with the use of workflows, allowing individuals to automate repetitive processes. The platform sends timely reminders to users based on roles and rights, following up automatically on uncompleted tasks in the process. By dividing tasks throughout different departments within the organisation, digital processes become a long term solution, built on a sustainable foundation.

Icologiq Elements operates according to the PDCA-cycle (Plan, Do, Check, Act) and complies to all accepted quality norms such as ISO 9001:2015, ISO 14001, OHSAS and FDA.

The implementation of the Icologiq Elements platform within your organisation occurs in an iterative manner to achieve optimal results. Due to checkups from time to time, during which you can share feedback and insights with us, you will remain in control of configuring the platform.

## Product Portfolio Icologiq

We would be happy to provide a solution! Contact our consultants for more information.

Erik Postma  
VP Quality Assurance & Environment  
en Risk Coordinator at HM.Clause

“The great advantage of the Icologiq Elements suite is that the use of its 9 module concept will almost automatically lead to full ISO 9001:2015 compliance. The fully integrated functionalities of the 9 modules allows us to capture all the benefits of process orientation, pro-active risk, audit, continuous improvement and show the related training and competency of staff.”

HM • CLAUSE

## Modular

Icologiq Elements is a modular system which can be easily set up and extended with multiple modules. Start improvement actions in Continuous Improvement based on preventive actions or change documents in Document Management if that is part of the improvement.

## Professional Support

During both the implementation and the period thereafter.

## Global deployment options

The modules can be deployed easily at other locations (globally).

## Immediate result

Modules can be implemented easily and are ready to use.
